- Cyber product distribution

JOB POSITION

CYBERSECURITY POSITION

1

Vulnerability Assessment

Configured and ran Nessus scans on client servers. Analyzed results and produced remediation reports.

2

Technical Documentation

Created TOR documents, POV setup forms, compliance tables, and brochures

3

Research & Analysis

Compared cybersecurity products (Cyble, Safous) and created infographics

4

Webinar Presentation

Delivered webinar: "Deep Dive into RPAM – Unlocking Advanced Security for Healthcare Businesses."

5

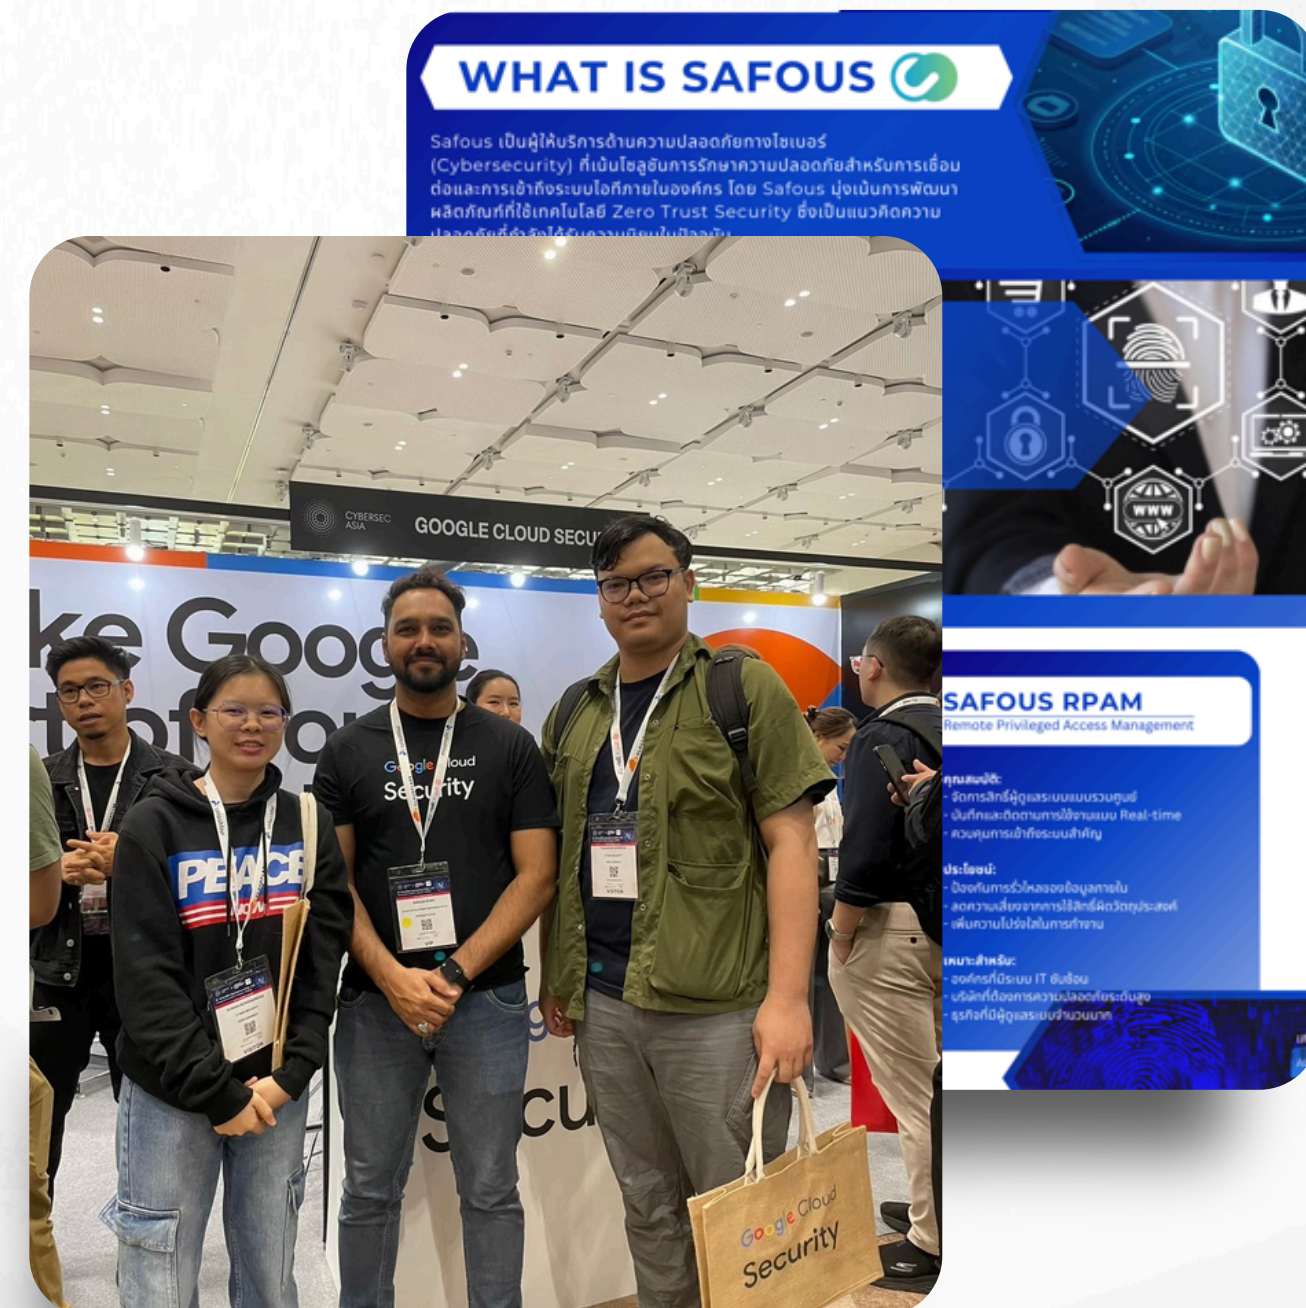

Localization & Content

Tested the Thaihua website and verified all content translation into English and Chinese

MONTHLY HIGHLIGHTS

MONTH 1 (JANUARY 2025)

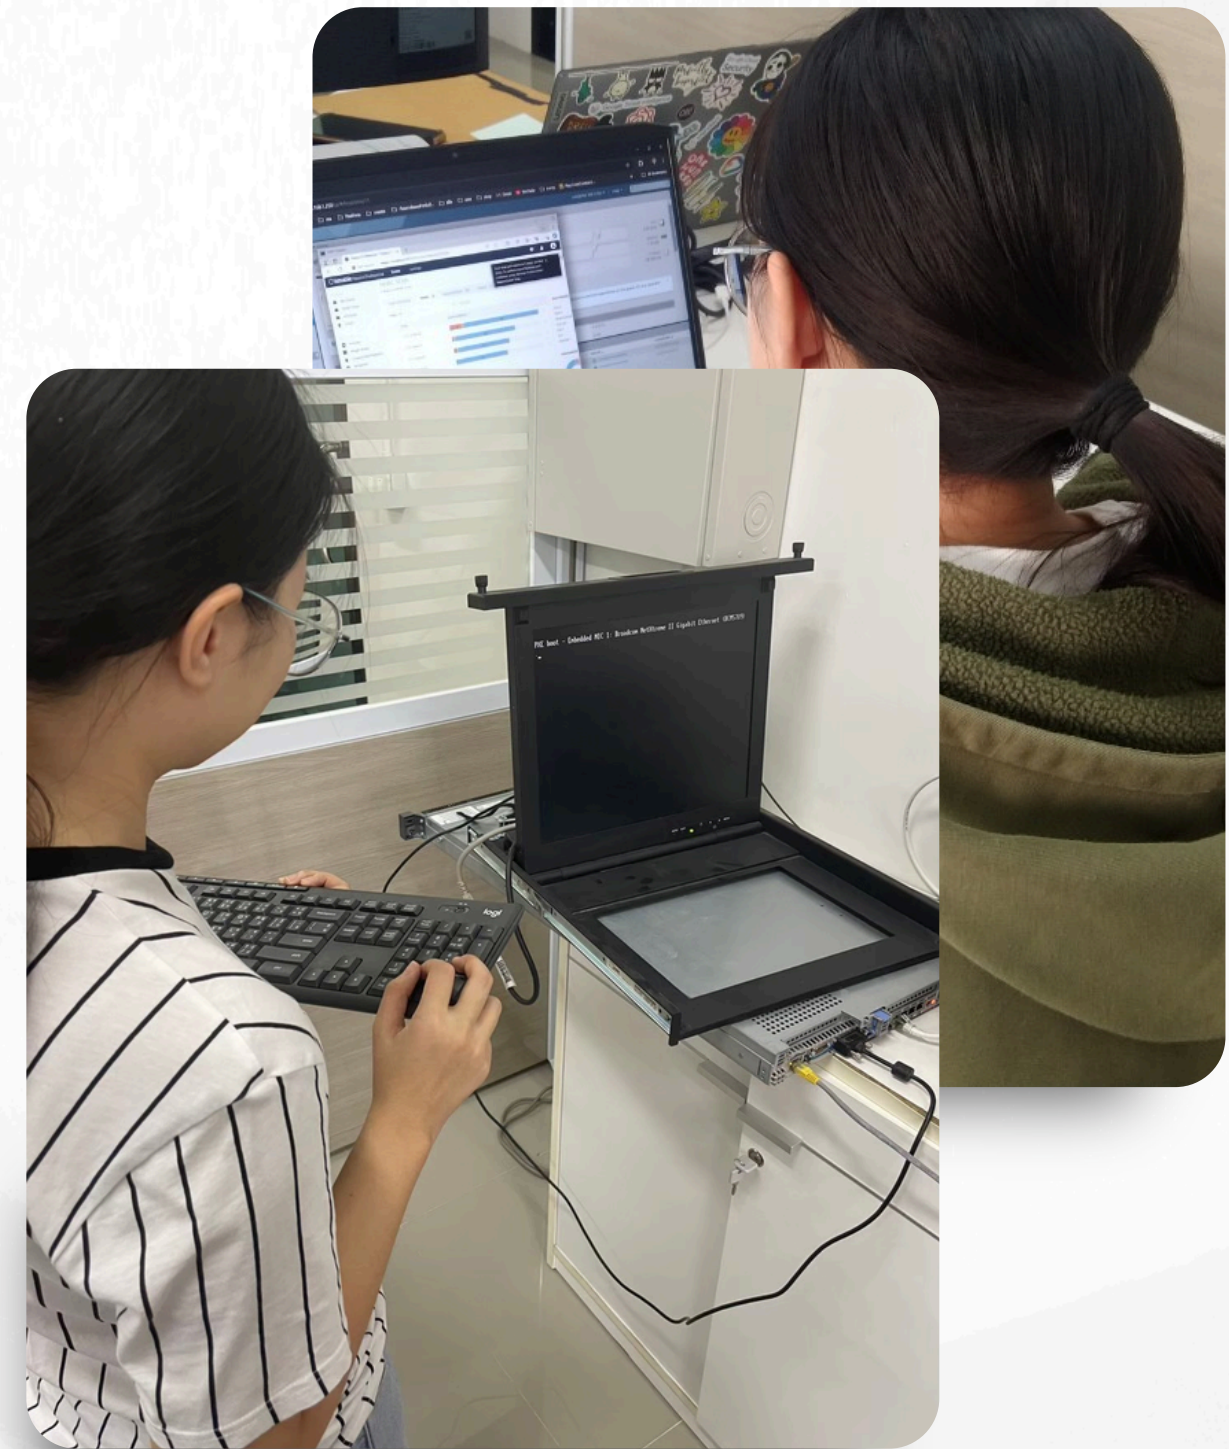

- 1** Created Compliance Table and supporting documents for the AI Lab Project for client submission
- 2** Designed infographics for Safous Solutions and Cyble products to promote on the company's Facebook Page
- 3** Researched Cyble products and created a Slide Presentation to enable management to present to clients
- 4** Attended Cybersec Asia × Thailand International Cyber Week 2025
- 5** Participated in a training seminar on Phishing and OT Security

JOB RESPONSIBILITIES

MONTH 2 (FEBRUARY 2025)

- 1** Created an infographic comparing products that management is interested in partnering with
- 2** Converted the Bank for Agriculture and Agricultural Cooperatives (BAAC) Excel table into a TOR (Terms of Reference) document in MS Word with supporting documents
- 3** Researched Cyble products and compared them against the TOR requirements
- 4** Set up a server, studied VA Scan theory, and conducted a Vulnerability Assessment for a client using Nessus
- 5** Studied RPAM and created slides for a Webinar titled "Deep Dive into RPAM – Advanced Security for Healthcare"

JOB RESPONSIBILITIES

MONTH 3 (MARCH 2025)

- 1** Refined slides and acted as Speaker for the Webinar titled "Deep Dive into RPAM – Unlocking Advanced Security for Healthcare Business"
- 2** Researched and tested the Veyon program (for controlling and monitoring classroom screens) for the AI Lab project
- 3** Conducted a study visit at King Mongkut's University of Technology North Bangkok (KMUTNB) for the AI Lab project
- 4** Created Manual Test Cases for testing the Thaihua company website

JOB RESPONSIBILITIES

MONTH 4 (APRIL 2025)

- 1 Created Cyble POV (Proof of Value) documents in both Thai and English for clients
- 2 Tested the system and reviewed content on the Thaihua website and reported issues to the development team
- 3 Added content and translated it into 3 languages (Thai, English, Chinese) correctly within the Thaihua website

Cyble Vision POV Setup Form

Cyble - POV Brand Executive Test Use Cases V1.0

KEY PROJECTS

1 Vulnerability Assessment (Nessus)

What I did: Set up Nessus, scanned client systems, and analyzed vulnerability data

Outcome: Delivered a complete VA report with remediation recommendations

Skills: Cybersecurity, VA Scan

2 RPAM Webinar (Healthcare)

What I did: Prepared slides and delivered a Webinar titled 'Deep Dive into RPAM – Unlocking Advanced Security for Healthcare Business'

Outcome: Received positive feedback, follow-up questions, and interest from potential clients in the company's products

Skills: Public Speaking

3 Thaihua Website QA & Localization

What I did: Designed test cases, tested the system, and verified content translation into English and Chinese

Outcome: Content corrected in all 3 languages, issues reported and communicated to the development team

Skills: QA Testing, Localization to English and Chinese

4 AI Lab Compliance Documentation

What I did: Built compliance tables and supporting docs for project

Outcome: Complete documentation package submitted to client on schedule

Skills: TOR Documentation
